This facility is a polypropylene manufacturing plant. The polypropylene plant was constructed to recover propylene from the fuel gas of the BP West Coast Products LLC Carson Refinery. The original permits for construction of the polypropylene manufacturing plant adjacent to the BP Carson Refinery were issued to ARCO Products Company in 1997. Operation of the polypropylene manufacturing plant started on December 31, 1999. The plant is owned and operated by ARCO Polypropylene LLC dba INEOS Polypropylene, LLC.

Pursuant to Title V of the federal Clean Air Act, AQMD is proposing to reissue existing facility permit for this polypropylene plant in the form of Title V permit. The Title V permit will contain all of the emissions limits and operating conditions contained in the previous permit and may require additional monitoring. The new Title V permit may also require additional recordkeeping, mandatory reporting of any violations of permit conditions, and annual certification by the permittee that the facility is in compliance with the new permit. The permit will be enforceable by the AQMD, the federal government, and citizens.

The proposed permit is available for public review at AQMD, 21865 Copley Dr., Diamond Bar, CA, and at

the Carson Regional Library, 151 East Carson Street, Carson, CA 90745. The proposed permit can also be viewed at <http://www.aqmd.gov/webappl/PublicNotices/Search.aspx> by entering the facility's ID number. Information regarding the facility owner's compliance history submitted to the AQMD pursuant to California Health & Safety Code Section 42336, or otherwise known to the AQMD based on credible information, is also available from the AQMD for public review.
